

## REMARKS

In the Notice of Allowance dated June 4, 2007, the Examiner objected to the drawings as not showing every feature of the invention specified in claim 26. However, the Examiner did not state which feature of claim 26 was missing from the drawings. The Applicants believe the drawings as originally filed clearly shows every structural detail that is necessary to understand the claimed invention. However, in an effort to advance the application, the Applicants have amended FIG. 1 and FIG. 2 to label the output of blocks 38 and 42 and the input of block 30. The output of block 38 has been labeled "ERROR SIGNAL". Support for this change is provided by at least claim 26 and page 7, lines 9 and 10. Also, the Applicants have amended FIG. 1 and FIG. 2 to label the output of block 42 as "CONTROL". This change is supported by at least claim 26, and at page 4, lines 18 and 19, and page 10, lines 5 – 8. In addition, the Applicants have added "center frequency" to the input of block 30 (see page 11, lines 17 – 25). No new matter has been added to the drawings as a result of these amendments. The Applicants believe that the drawings, as amended, clearly overcome the Examiner's objection to the drawings and respectfully request that the Examiner accept the amended drawings.

Respectfully submitted,
